

### Impact of Graduates on P-12 Learning

Several graduates of PNW were employed in the same local schools. In order to measure the impact of teachers on P-12 student learning an analysis of ISTEP passing trends of the schools in which they teach was conducted.

Only schools in which more than one teacher was employed were used in this study. Overall, the trend for the schools in which our graduates worked have improved from 50-52% from 2016-2017 to 2017-2018. The Indiana state average ISTEP remained steady at 51%.
