Program name. Physical Sciences - Forensic Science Concentration

Degree name(s). (If applicable.) Bachelor of Science

## Section I: This section is for changes in programs, minors and certificates

## List the major changes in each program of study, minor or certificate.

Modifications to the General Physical Sciences - Forensic Science plan of study to incorporate approved FIS courses (FIS 14000, 14005, 24500, 35000, and 41000). ). In addition, SOC 32400 is allowed as an alternative to CRJU 32400, and SOC 10000 is added to fulfill the prerequisite for SOC 32400. The total number of credits added is 18 (shown in BLUE on the proposed plan of study). Courses and unspecified electives removed are: SCI 14000, three Restricted Electives, one Free Elective, and the only CES Elective (shown in RED) on the current plan of study.
Several courses were moved from one semester to another in order to sequence the concentration courses properly so they are spread over many semesters and to allow students to meet the prerequisites for higher level courses in a timely fashion.

Impact on Students. (State " $\mathrm{N} / \mathrm{A}$ " if proposal will not greatly affect students.)
Provides additional forensic oriented courses for students pursuing this concentration
Impact on University Resources. (State "N/A" if proposal will not require new resources, faculty or funds.) We currently offer FIS 14000 and 14005 (replaced SCI 14000 and 14005) with qualified LTLs and laboratory resources of the department. The additional FIS courses can similarly be handled initially with qualified LTLs and the existing cross disciplinary laboratory resources. However, as the program grows there may be a need for at least one full time faculty.
Impact on other Academic Units. (State "N/A" if proposal will not affect other units.)(Include name of person in affected area discussed with)
