How to make a course available to students?

1. Log into the course.
2. In the **Control Panel** click on **Customization** and select **Properties**.

3. Select **Yes** to make course available.

4. In Step 3, by default the start and end dates have already been set. The start date will be 7 days prior to the first day of the term and the end date will be 14 days after the last day of the term. If you’d like to make the course available sooner than 7 days prior to the first day of the term, reset the **Start Date**.
5. Select the respective campus of the course.

6. Click **Submit** to finish making the course available to students.
