Technology Building (TECH) Second Floor

Building Text Description

Building Location:
The Technology Building (TECH) is located in the center of campus, just south of Central Drive and the Plaza. TECH is north of the Dworkin Student Services and Activities Complex and is directly east of parking lot #5 and northeast of parking lot #6.

 Entrances:
There are seven (7) entrances and one loading dock into TECH. All of them are located on the first floor. To access the second floor of TECH there are two (2) stairways and one (1) elevator that lead onto this floor.

 Elevators:
There is one (1) Elevator (2E01) in TECH, located at the corner of the north hallway and the west hallway in the northwest corner of the building.

 Stairs:
There are two (2) stairways on the second floor of TECH.

- The South Stairway (2S01) is located at the south end of the west hallway through two sets of double doors opening into the stairway.
- The North Stairway (2S02) is located at the northeast end of the northeast hallway, with two single doors opening into the stairway.

 Restrooms:
There is one (1) set of restrooms on the second floor of TECH. The restrooms are located off of the north hallway in rooms 248 and 250.

- The Women’s restroom is 248.
- The Men’s restroom is 250.

 Building layout (hallways & open areas):
There are seven (7) hallways on the ground floor of TECH. The west, north, east, and south hallways all connect to form a rectangle.

- The North Hallway runs west to east, connecting with the west hallway, the east hallway, and the northeast hallway.
- The Northwest Hallway is an inner hallway forming its own rectangle, stretching east to west from its connection to the north hallway, separated by single door, and then cornering to run north to south twice. The first hallway split only corners to the north
and then corners west again and connects with the second split. The second hallway split runs both south and north, connecting with the first split.

- The **Northeast Hallway** runs north to south, then west to east connecting the corner of the north hallway and the east hallway with the north stairway.
- The **East Hallway** runs north to south, connecting to the north hallway, the northeast hallway, and the south hallway.
- The **West Hallway** runs north to south, connecting to the north hallway, the south hallway, and the south stairway.
- The **South Hallway** runs west to east, connecting to the west hallway and the east hallway.
- The **Southeast Hallway** is an inner hallway forming an incomplete rectangle. It runs west to east off of the corner of the east hallway and south hallway, accessed through room 269. At the east end of the hallway the hallway corners north to south to corner again to run east to west, connecting to room 269 again at the west end of the hallway.

**What is an Access Point?**

In a wireless local area network (WLAN), an access point is a station that transmits and receives data (sometimes referred to as a transceiver). An access point connects users to other users within the network and also can serve as the point of interconnection between the WLAN and a fixed wire network. Each access point can serve multiple users within a defined network area; as people move beyond the range of one access point, they are automatically handed over to the next one.

**Coverage:**

Wireless coverage is available throughout all academic buildings on campus, and the campus police building.
