Comments	7	<ul style="list-style-type: none"> We never learned statistics, we learned how to use statistical software, thats all. The instructor needs to slow down on topics and the notes need to be closer to what is on the homework. The notes did not help with my homework or quizzes. The instructor is super helpful and makes the material easy to understand. The fast pace the lectures maintained made the class fun and much more exciting than it could have been. Stat crunch makes statistics less time-consuming; the instructor gave us all the tools to be able to properly use it. Great class. I think the class would be more effective if we used stat crunch while learning the lesson. I felt that the lecture didn't go with our homework we did on stat crunch. I felt like the class was moving a little fast-paced at times, while going over content in class, and sometimes it was hard to follow because of the fact that the professor sometimes spoke to fast. Otherwise, I think that he was a great professor and was always willing to help when I didn't understand the content! I'm glad that I got to have him as a professor for this course! A well organized course with plenty of material to reference. The course is very fast paced to cover the material. The instructor does an excellent job of being available for questions outside of office hours. The classroom was not designed well for lecture and overhead use at the same time. Technology hindered classroom progress by waiting for Mystatlab to load or problems with the printer. The timed quizzes should be omitted. It is too difficult to understand the question and find the right method when adding the timed stress. There were many times that I was only halfway through a quiz when I was timed out. It isn't showing my ability, just that I am not proficient.

Comments	6	<ul style="list-style-type: none"> Instructor poorly explained use of the program, StatCrunch. We were expected to use only this program. Instructor made us give him our Skype account name..this made me very uncomfortable so I did not use this as a means of communication. I, also, felt it was wrong to force us to give him that information. By force, I mean that he would not allow us to register until he received this information. He was a difficult instructor to speak to.. always on the defense and comparing us to previous students who performed poorly even though I maintained an A/B throughout the semester. He did not allow enough time to complete assignments/quizzes. He even agreed to not giving us enough time, yet did nothing to correct his mistake. Do not recommend! Prof Kuhn goes out of his way in order to help This has to be one of the hardest classes I have ever taken online and THE HARDEST course that I have taken outside of my majors courses. That being said Professor Kuhn does an excellent job at teaching a class online that should be, in every way, impossible to teach online. John was always there when I needed him, responded back to me quickly, and provided us with constant weekly updates of how the online students and class students were doing. I have, without a doubt, never seen a teacher work as hard as this one does! Having this course available online is extremely helpful. I just wish there were online videos of the classes. I would help greatly. I believe Stat 301 should not be an online class. It was very difficult to actually learn things. I didn't retain any information from this class. John Kuhn doesn't do a well job of teaching the online students. Whenever I asked a question through e-mail, he would send me a list videos of how to do the problem, which still didn't help me. Also, he would tell me to use Skype to contact him. I work three jobs and would do my homework at random hours and even sometimes at work so I wasn't able to use Skype. He never would explain things to me over e-mail, so it made me ask other students over e-mail. For me, it is incredible difficult to be able to pass the final after taking the online course. The quizzes and homework was all open book online and now the final is in class. This was by far one of my favorite classes this semester. Usually I wouldn't take Something that deals with formulas and numbers online because I figured it would be more difficult. However; Dr. Kuhn was an excellent professor, very helpful, and willing to go above and beyond to make sure we succeeded in this course. I would recommend his courses to anyone that struggles with things like math and statistics, he's a big help.
