Comments	6	<ul style="list-style-type: none"> This is by far the hardest class I have ever taken, online or otherwise. It is an overwhelming topic that I would not recommend be taken online. The professor spent a great deal of time keeping the online class up to date on what is expected. He also made him self available to get help face to face. This is the hardest class I have taken to date but it was nice to know that the professor understood that it was going to be challenging to his students. Wow, what a class! What an instructor. Dr. Kuhn is top-notch in teaching this class. He is helpful, insightful, and anticipates the students needs and does everything he can to help us get through a tough class. He is truly a real teacher at heart and not just someone trying to muddle through. If I were not graduating, I would take other courses that he teaches. Should spend some more time using excel, rather than just the calculator. This class is very organized and the instructor is always available to help! Great class! Prof. Kuhn was always available and gave us updates at least once a week. He responded to emails and offered assistance without hesitation. Very professional and courteous. The only thing I would recommend would be to advisors to strongly suggest taking the class in person if you've never had a statistics class or recent exposure to this subject. The on-line version is tough but again Prof. Kuhn offered to let the on-line students attend class they wanted to. I really want to stress that this is a well organized class and assistance was available in many formats. I appreciated the work he's done to create this class. Thank you!!

Comments	8	<ul style="list-style-type: none"> • Great Teacher! • This course is challenging. I really like Professor Kuhn's methods of teaching and think he is a great professor. He does talk very fast though. • This instructor goes way too fast when he teaches. • excellent class. Professor Kuhn is an excellent instructor who goes the extra distance with each and every student. He is a plus to PNC. • Professor Kuhn is very organized and it helped out when it came to knowing what to prepare for for this class. He is very professional but also shows that he cares very much about his students. I hate the fact that all our assignments are online. This eliminates the possibility for partial credit for simple mistakes (like format misplacement or rounding error). I also think that if the classroom is a computer lab, then all the computers should be locked or at least unable to going to certain websites(like FACEBOOK). It is so unfair that the two girls I sit next to in class are contantly on Facebook, and have never bothered to print out the class notes, but are getting better grades in the class than I am because they are 'lucky guessers' on multiple choice questions on the homework/quizzes and someone else helps them figure out the answer to the other problems. It isn't fair to those students who actually pay attention in class, and follow along with the notes provided. Thank you Professor Kuhn! • This professor is great at teaching Statistics! • I really like this course. The professor is very willing to work with students missing deadlines because of technical problems with the math program and is more than willing to stay after to help with any questions or homework. He is a great teacher. • I hate Stat with a passion but Kuhn made the class interesting and fun which made it easier to learn..great professor!
