While I did use the videos that were provided I think that it would be helpful to have the calculator functions somehow incorporated into either the help or similar example functions of the attendance problems.</li> <li>I think the class was great but the only thing I didnt like was the book. It wasnt detailed enough for being an online class. But the class in all was great.</li> <li>This is a tough course to take online. I really like that Professor Kuhn allows the online students to listen to the in class lectures if they need to.</li> <li>I have a lot to say about this professor. Statistics is by far a very difficult subject. Dr. Kuhn ABSOLUTELY loves his job. I appreciate someone who takes a subject such as this and is happy to teach students and explain to them something that is almost impossible to learn. He loves being in class everyday and he always ALWAYS helped me outside of class. I had him for online STAT and he told me the first day of school I was able to attend his regularly taught class. I feel if it wasn't for him I would of never passed this class. I feel he needs more reconition for what he is doing! He's an amazing professor and I'm thankful to of had him this semester.</li> <li>Really wished i could have taken this course in class instead of online. I had a really difficult time learning without a teacher.</li> <li>Seemed like the class was mainly how to use the calculator with different formulas. May have been more interesting if the we looked into the rational a little more. Overall good class, tho.</li> <li>This was a difficult online course. I appreciated the instructor's willingness to help students.</li> <li>Good class. Difficult but fair</li> <li>Dr. Kuhn has demonstrated a sincere interest in his student's grasp of the material. His class is beautifully organized. I am an online student and really appreciated his efforts. I particularly like the ongoing feedback and found it to be motivational as well as informative. I was anxious about taking statistics but Dr. Kuhn's methods have proven successful.</li> <li>This course was very difficult being online but a lot was offered for assistance to do well in the course.</li> </ul>

Comments	10	<ul style="list-style-type: none"> <li>This class was very challenging and I would have to say that Dr. Kuhn is extremely knowledgeable and the most accessible professor I have ever had. Great class that keeps you hopping.</li> <li>Professor Kuhn is one of the best math professors I have had here at PNC. He is very accessible to his students before and after class. He goes out of his way to ensure that his students understand the material and able to get the best grade that they can. If ever I have to take another math class, I hope that I would be able to have him.</li> <li>It seems like a lot to memorize, especially what to use on the calculator. He did well teaching it in class but sometimes going home and looking at the quiz made my mouth drop because some of the things on the quiz were just nothing I really recognized from class so it was complicated to get an A on the quizzes and homework. He explains a lot of the stuff well though and helps students a lot, making sure they know what he's doing before moving on and providing time in class to go through some of the attendance problems.</li> <li>Great class.</li> <li>Nicest teacher I've ever had</li> <li>Mr. Khun really enjoys he job. He is always willing to help and has a great attitude. He is always patient.</li> <li>I feel that Mr. Kuhn is the most accessible instructor I have ever had. He will go out of his way to help you, he stays after every class to help anyone that is struggling or has questions. Mr. Kuhn is outstanding in a very difficult class. If you are failing this class, its your fault. He gives every student an opportunity to get first hand help. Statistics has been very difficult for me, but I am glad I have such a strong teacher. The answer is A-Allison-my sister's name:)</li> <li>Great Professor</li> <li>Professor Kuhn rushes through the course material even if people are behind or are doing poorly. If the class as a whole is struggling with something, he does not stop to go back and go over it, he just moves on.</li> <li>Go over the attendance in class the whole day and then the next class day go over coursecompass. Also, don't start the homework/quizzes/Tests on a friday, but start them on Tuesday so everyone understands the material. This way were not so rushed trying to get the homework done by Thursday. A computer classroom with everyone facing the board would be so much easier to see instead of turning back and fourth. Great professor who wants everyone to understand the subject.</li> </ul>
