Did not like how we had to pay for quizzes after paying for the course, did not cover material on the online homework and the quizzes. Did not appreciate having 136 questiond due during dead week.

I thought his lecture notes were useless. They did not help me at all. His lecture was very different from the homework.

I understand why he is teaching us to use statcrunch, but in my opinion he is just teaching us how to cheat. He needs to teach us how to do everything by hand as well as using stat crunch. Also, i don't like how he treats us like kindergarteners and holds our hand through everything. i really dont feel like i learned anything in this class.

My favorite part about this class is all the assignments and quizzes were due at the same time and day every week and were always worth the same amount of points. This class was very predictable and thus comfortable to plan for. The professor was available at a wide variety of times for office hours and was very approachable and accommodating. This class was the first one I've taken that utilized Proctor U and I didn't really like using that mostly because I didn't have a good internet connection or computer to use. I would recommend making the class laptops we used available to take Proctor U quizzes on in the future. Overall I really enjoyed the class.

Professor Kuhn expects far too much out of us as students. He thinks that this class should be the only class that matters to us as students when we take it. We recently recieved a 136 question Homework, he stated that it will take 10-15 hours to complete the assignment. As a athlete and a employee and a full time student it is near impossible to complete everything that he requires. Also he makes us pay to take supervised quizzes. I find this appalling. We pay so much for the online materials and he expects us to pay to take quizzes. I know this is a difficult class the requires alot of work but as I stated before, it is nearly impossible to get everything that he requires completed. Please for the future students that take this class, have a talk with professor Kuhn. Tell him that paying for quizzes online is a waste of time and money. Ask him to do in class quizzes where he can supervise us FOR FREE, also please ask him to tone down the amount of work he expects us to complete.

There were often times during class in which the instructor spoke to me in a condescending tone insulting my intellignece. I would not take another course taught by him.

i like how he got to know each of his students names which is uncommon for a professor with so many students. I like how he kept everyone engaged and involved the class in lecture! It helped me understand and keep me awake
